

Queer Statistics. We give, from the newspapers the figures of the assessments of three counties this week, Holt, Atchison and Nodaway. They are taken from the newspapers, and may not be accurate in all respects, but they show an extraordinary difference as to values. For instance, Nodaway has about seven times more horses than we have, yet they are valued less than twice as much. She has three times more cattle valued about twice as much, and twice as many hogs valued less than twice as much, and so on. Surely if these figures be correct, there ought ito be some inquiry as to the hows and whys.

Here are the items from Nodaway, and below are those from Holt. Take notice also that for all Nodaway bas almost double our population, stands seventh in the State, while Holt is somewhere near the fftieth, yet our money etc. almost as much and personal property about the same in value.

NODAWAY COUNTY. Horses, mares and geldings, all ages, 41,229, valuation, \$433,265. Mules, all ages, 2200; valuation, \$83,-

Nont cattle, all ages, \$55,249; valuation, \$580,354.

Hogs, all ages, 85,606; valuation, \$112,439.

Money, notes, bonds and other credits, \$666,839. Other personal property. \$506,998.

Total valuation, \$2,421,394. HOLT COUNTY.

No. of nores taxed, 271,768; value \$2-, 454,000. Horses, 6,000: valuo \$247,000, Mules 1,615; value \$81,500. Cattle 19,000; value \$261,000.

Hogs 45,000; value \$134,000, Money, notes and bonds, \$518,000. Other personal property, \$518,000. Total personal, \$1,733,000. Real and personal, 4,500.000.

Interesting About Grapes!

Some very interesting facts as to wine growing we have been able to gather on the request of the Agricultureal Department. Mr. Houseworth tells us that from his lot of 80 by 160 feet he produced last year over 800 gallons of wine, which he; sells at 80 cents per gollon. He produced 24 barrels. He says "one stick has furnished 4 buckets of wine," i. e. 12 pounds of grapes per bucket or 48 pounds of grapes from one vine. Some vines furnishing bunches weighing 2 pounds each bunch. The amount of wine grown by some around town is as follows:

Sound Sense

I cannot imagine where the sound sense comes in at stated in your last, Reported from the Jefferson City State Journal in reference to the prohibition in Missouri. We could not expect anything else from our bourbon legislature than that they would sit down on such a proposition but we claim it is just the law we want and the sooner it becomes general, the better. Kansas has already enacted it, Nebraska and Iowa will soon tellow her example and then Missouri will be over run with the slums and filths of the whisky element of those States, while a large percent of the temperance element of our State all of whom are generally of the most influencial and best class of society, will emigrate from our State to those States, and that is not all. Thousands from the eastern States are coming west, will select locations where they will have the assurance that they can rear their of produce at WE Minton's Forest City. children unsurrounded by such degrading institutions as the dram shop, breweries, wine houses and distilleries. Such will pass over our fine lands to find houses in temperate Kansas. Are wine, beer and whisky essential to

Smith presiding. our growth and prosperity? While we are ready to admit, it is a hard problem to solve how to reform the drunkard or to keep the people from drinking intoxicating liquors, certainly not by fostering the manufactures and sale of the same nor by influential County difference between a square mile and a light strikes two points above the nos-Papers opposing prohibition. For just as long as we permit the manufacturers and sale so long we will have drunkenness to an extreme. But say you we mile square is a piece of land in the friends. Thus we need not feel or have been at great labor and pains to form of a square, being three hundred smell our friends, or hear them to recgather up and publish information res- and twenty rads on each side and a ognize them-We know them from pecting the inducements the State offers to wine growing. We have induced torm of a square, being five thousand incomprehensiqle asit is, there are some people to come here from the old world two hundred and eighty feet on each people believe it They have even preand invest in the production of wine side," and the difference between three tended to introduce such beings among and beer and we are continuing to do miles square, and three square us and have applied tests that if applied so." And so we have, but is it right? miles, is six square miles. What is it used for but to start our young men on their ways to drunkards from Bigelow to Chicago, one day last ings exercise this pretended sense they graves. You know what it is doing in our week three cars of cattle, average have the assurance to tell us it can not own county and all over the State. It is enough to make us shudder for the safety of our young men and boys. We stopping in Bigelow for two or three could see we could understand it! don't object to the growth of the fruit months, left on last Monday, for Blanbut we do object to manufacturing it in chard, Iowa, accompanied by her sister to poison to drag our children down to Jenny, who lives in Maryville, Mo., and destruction.

Germany is becoming alarmed at the

here if space would permit the report Democratic central committee, as of the great premier Prince Bismarck suitable person to fill the vacancy now mon the subject. He has recommen- existing in the County Court. But ded the government to take some steps unfortunately, we learn that Mr. Chunto counteract the great evil which he ing will not accept states arises from the manufacturing and sales of wines and beer. Should we not take this as a timely admonition? City, Forest City, Craig and Rulo. We welcome the imigrant but we can do'withou! the wine and beer. They that sew the wind shall reap the whirlwind. If we allow the cause the effect

and succeeded in leading public senti-

ment in favor of sush accursed indus-

tries and against prohibition. This is

a country where the majority are sup-

posed to rule. Again you say the inor

dinate appetites of men are not restrain-

ed by arbetrary exactions, prohibitory

enactments. Neither are the inordinate

crimes of men restrained by law en-

tirely or we would not have any mur-

der cr other crimes, but still it is nec-

essary to have laws prohibiting and

punishing such crimes! At least one

half at the crimes are directly or indi-

rectly the outgrowth of intemperance.

moral duty as an intelligent and en-

lightened nation to enact and enforce

such laws that will destroy the cause of

crime. We believe a good majority of

the citizens of our county would vote

for prohibition, and we would like to see

THE COUNTY PAPER of which we are

proud, come out on the side of right in

this great moral reformation. We are

We open our columns of course to all

kinds of expressions on the Femperance question. But we beg leave to

represent our own views. Thirty years

ago we were as ardent for prohibition

have lived where prohibition was so

severe and thorough that we have seen

people arrested, fined and imprisoned

merely because their breaths smelled

of liquor! For a few months it utterly

stamped out the liquor trade by terror.

Still human devices grew up, friends

sympathized with those who had been

prosecuted and soon the liquor question

became the ruling power in politics,

because those hostile to the law sought

to put officials in who would moderate-

ly enforce the law. No laws can be

strictly enforced except those to pro-

tect the weak from personal abuse by

the strong, and the community from

robbery and theft, and the like. Strange that people will not see this tili af er long years of experience.

Delicacy of Mint Scales.

The five gold weighing scales in the New Orleans mint are marvels of mechanic invention and accurate workmanship. The larger of the two has a caship. The larger of the two has a capacity of 10,000 ounces troy, or about 586 pounds avoirdupois, and when loaded to its full weight will indicate a variation of one thousandth part of an ounce, or the millonth part of its weighing capacity. Another pair of scales is the one intended for weighing gold only. It has bearings composed of the finest agates, which have been ground with wonderful precision. So delizate is this machine that it will give the precise weight of a human hair, and is susceptible to the slightest atmospheric changes. Millions of dollars' worth of precious metals are weighed annually upon these scales.
